

MobiliseYourCity Mastering Mobility Series

Mobility for all? Integrating gender perspectives into SUMP and NUMP

DATE at TIME (TIMEZONE) – [Insert link to virtual session here](#)

1. Description

Gender is one of the most significant determinants of mobility choices, yet traditionally overlooked in mobility planning. For sustainable urban mobility to succeed, we need to take gender differences into account. Gender-responsive mobility planning strives for equal access to our communities, services, and employment – the power to shape one's life. In this session, we introduce the connections between gender and mobility and explore ways of integrating a gender-responsive practice along the SUMP/NUMP planning cycle.

2. Learning Objectives:

- Understand the weight of gender for mobility behaviour
- Discover ways of integrating gender step by step along the planning cycle for SUMP and NUMP
- Reflect on lessons learned from other cities
- Take away new resources and inspiration for your context

3. Speakers
