## Some general notes on this session

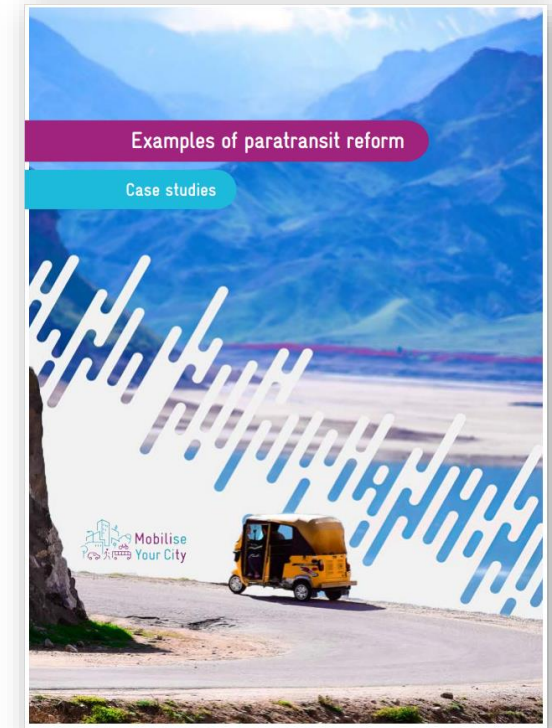

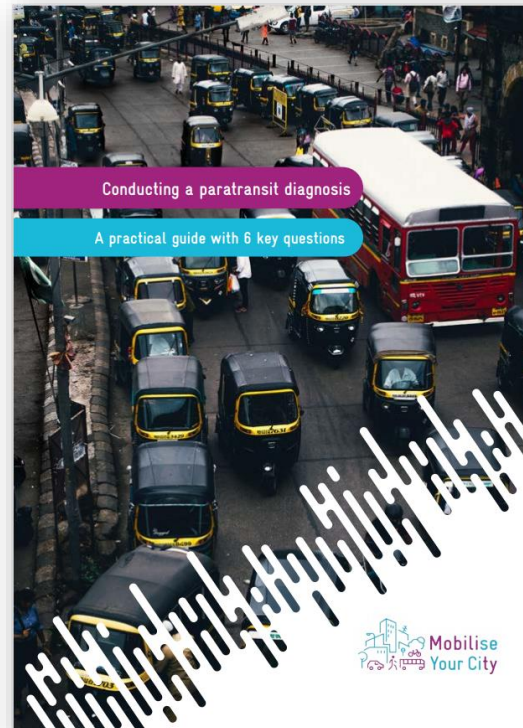

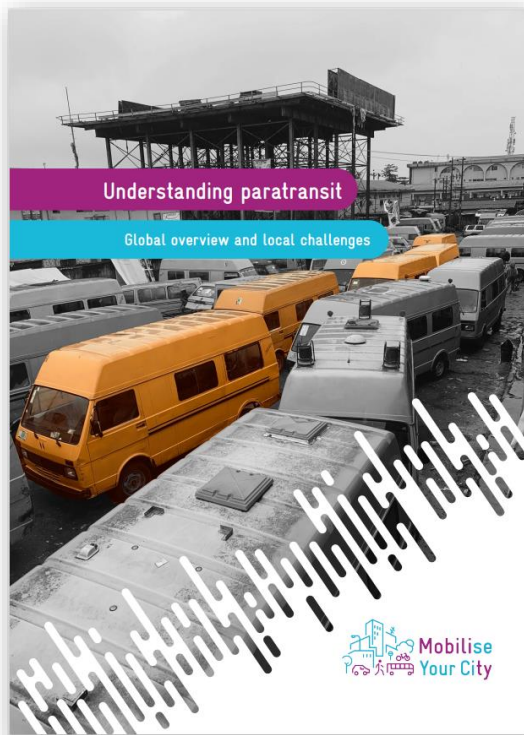

This session will be recorded. You will not appear in the recording if your camera is kept off. If you turn on your camera, you agree to appear on the recording, which we will upload on our channels.

During the session you can interact either by raising your hand and using your microphone, or by writing in the chat.

# Launch of the Paratransit Toolkit series

# Webinar series on Paratransit

Driving Change:  
The Vital Role of  
Paratransit in  
Sustainable Urban  
Mobility

*10th October 2024*

Driving change:  
Paratransit  
reforms in Lagos  
and Kumasi

*17th October 2024*

Driving change:  
Hands on the  
MobiliseYourCity  
Paratransit Toolkit

*24th October 2024*

## Learning objectives

- Utilise the Paratransit Toolkit to assess and diagnose challenges in paratransit operations within the context of a simulated case study
- Apply key strategies and recommendations from the toolkit to develop tailored solutions for improving paratransit services.
- Reflect on the workshop experience to identify actionable insights and best practices for fostering sustainable and inclusive urban mobility through paratransit reforms.

# Contents

---

1

Welcome & Housekeeping

2

Exercise 1: Mapping the ecosystem of stakeholders

3

Exercise 2: Diagnosing the paratransit sector

4

Exercise 3: Elaboration of a strategy to improve the paratransit sector

# Our fictional city...

## Governance

- Local municipality in charge of public transport regulation
- Licences are unregulated
- Police gets low wages

## Current supply

- Minibuses are provided for most of the daily trips
- Moto-taxis are becoming more and more important
- No MRT, previous bus company which collapsed in the 1980's

## Demand

- Multi-million city with fast growth over the past decades
- Demand is growing, mostly from peripheral areas where a lot of the rural population is migrating, leading to a rapid sprawl of the urban area towards the smaller neighbouring towns

## Planning

- SUMP to be implemented
- BRT project to be implemented by the transport department at the municipality
